# An after-school program like nothing your kids have seen before!

It's fun, it's challenging, and it can really make a difference in your child's performance at school. Did we mention you could save up to 70%?

Led by our talented and fun instructors, Edison Club begins with an assessment of your child's math and reading skills to identify areas for improvement. We monitor your child's homework assignments and ensure their work is completed. Choose from any of our science, technology, engineering, art and math (STEAM) programs on an ongoing basis.

After each session, you will receive an email with a Daily Report Card that includes an evaluation and progress update of your child's math and reading skills, STEAM programs, and school homework completed.
